

Tall Tree Wind Farm

LOCATION

Central West Victoria

CAPACITY

Up to **360MW**

STRUCTURE

Up to **53** turbines with a maximum height of 250.5m

JOBS

270 construction jobs
10-12 permanent full-time roles

ANTICIPATED CONSTRUCTION COMMENCEMENT
2028

About the project

The Tall Tree Wind Farm is a proposed renewable energy project, located within the proposed Central Highlands Renewable Energy Zone (REZ) in Central West Victoria. The project has the potential to generate enough energy to power up to 250,000 homes annually, with up to 53 wind turbines on site. The site was chosen due to its strong wind resource, open, undulating terrain, nearby port access and proximity to a strong grid connection.

Leaders in renewable energy

ACCIONA Energía, the world's largest renewable energy company without a fossil fuel legacy, develops, builds, owns and operates renewable energy assets in Australia. We collaborate with communities to produce sustainable energy, create jobs, and contribute to establishing Australia's low-carbon economy.

Connection to country

In the spirit of reconciliation, ACCIONA Energía acknowledges the Traditional Custodians of Country throughout Australia and their connections to land, sea and community. We pay our respects to their Elders past and present and extend those respects to all Aboriginal and Torres Strait Islander people.

Location

The Tall Tree Wind Farm is a proposed renewable energy development located within the Golden Plains Shire, south of Meredith, west of Lethbridge, north of Teesdale in Central West Victoria.

Community benefits

JOBS & LOCAL ECONOMY

As part of the proposed Tall Tree Wind Farm, ACCIONA Energía will create up to 270 construction jobs. In the operations phase, we'll need a team of 10- 12 staff to maintain and operate the project over its multi-decade lifespan.

PROCUREMENT AND SUPPLIER OPPORTUNITIES

Our procurement policy aims to source as much work and supply as possible from local businesses, ensuring economic growth and development opportunities that benefit local communities first. From earthworks to catering, we want to work with local people to supply our projects.

COMMUNITY INVESTMENT PROGRAM

We will establish a co-designed community investment program to support the wider community. Whether through legacy projects, energy subsidies or grant schemes, these investments will be developed and tailored to support local residents.

We will also offer scholarships to local students to progress to tertiary education.

NEIGHBOURHOOD BENEFIT PROGRAM

The proposed program delivers annual benefits between \$1,250 and \$10,000 during the project's operational period (typically up to 30 years) to eligible residents with a dwelling within 2.5km of a turbine.

Anticipated timeline

In September 2025 The Minister for Planning decided that an Environment Effects Statement (EES) is required for the Tall Tree Wind Farm under section 8B(3Xa) of the Environment Effects Act 1978.

Feasibility and investigations

2020-2025

Environmental assessment and approval - referrals

2025-2027

Anticipated construction commencement

2028

Anticipated operations commencement
