

HERRIES RANGE WIND FARM

ABOUT THE PROJECT

The proposed Herries Range Wind Farm is expected to include 112 wind turbines and is part of ACCIONA Energía's MacIntyre Wind Precinct, a renewable energy hub being developed near Karara and Gore in the Southern Renewable Energy Zone.

The site is within the Southern Downs, Goondiwindi, and Toowoomba Regional Council areas. ACCIONA Energía is working closely with local landowners, government and the community to develop this project.

Location	Capacity	Structure	Jobs	Anticipated construction commencement	Anticipated operations commencement
 Karara, Southern Queensland	 762MW (approx.)	 112 turbines	 Up to 650 during construction, 50-60 ongoing full-time roles across the MacIntyre Wind Precinct	 Late 2027/ early 2028	 Late 2031/ early 2032

ABOUT ACCIONA ENERGÍA

ACCIONA Energía is the largest 100% renewable energy company in the world with more than 20 years' experience in Australia. We have five operational wind farms and one solar farm in Australia. We own our assets over their entire operational lifetime, from construction to decommissioning and we are deeply invested in the long-term future of the communities in which we operate.

UPDATED PROJECT LAYOUT

The updated project layout was influenced by community feedback and findings of environmental studies, resulting in a substantial review of the project layout in 2025 and early 2026, including the removal of turbines, realigning of the transmission corridor and access tracks to minimise environmental impacts to the greatest extent feasible.
