

Keri Keri Wind Farm

LOCATION

Keri Keri, NSW is approximately 35km east of Balranald and 30km from Moulamein in south-west NSW

CAPACITY

Up to **709**MW

STRUCTURE

Up to **114** turbines plus Battery Energy Storage System (BESS)

JOB

650 during construction
Up to **15** full-time roles during operation

INVESTMENT

\$2.3 billion

About the project

The Keri Keri Wind Farm is a proposed renewable energy project, comprising up to 114 turbines and a Battery Energy Storage System (BESS) located in south-west NSW. The current project boundary encompasses more than 18,000 hectares of land. The area is characterised by large pastoral landholdings predominantly used for merino sheep farming. The site is exposed to consistent winds and is located within the South-West Renewable Energy Zone, which is one of five areas identified by the NSW Government as a priority region for the development of renewable energy projects.

Leaders in renewable energy

ACCIONA Energía, the world's largest renewable energy company without a fossil fuel legacy, develops, builds, owns and operates renewable energy assets in Australia. We collaborate with communities to produce sustainable energy, create jobs, and contribute to establishing Australia's low-carbon economy.

Connection to Country

In the spirit of reconciliation, ACCIONA Energía acknowledges the Traditional Custodians of Country throughout Australia and their connections to land, sea and community. We pay our respects to their Elders past and present and extend those respects to all Aboriginal and Torres Strait Islander people.

Location

The proposed Keri Keri Wind Farm is located approximately 35km east of Balranald and 30km from Moulamein in south-west NSW. The site is located east of the Yanga State Conservation Area and Murrumbidgee Valley, within the Murray River Council Area. The site is flat and has good access to transport infrastructure via the Sturt Highway and other local roads.

Community benefits

JOBS AND LOCAL ECONOMY

ACCIONA Energía is creating up to 650 construction jobs through the project, as well as offering pathways to gain experience working on a major project. In the operations phase we'll need a team of around 15 people to maintain and operate the project over its multi-decade lifespan.

PROCUREMENT AND SUPPLIER OPPORTUNITIES

ACCIONA Energía commits to sourcing as much work and supply as possible from local businesses, ensuring economic growth and development opportunities that benefit local communities first. From earthworks to catering, we want to work with local people to supply our projects.

DEDICATED COMMUNITY BENEFIT-SHARING PROGRAM

We will establish a community benefit-sharing program that will invest in community organisations and others to deliver programs for the wider community. From legacy projects or grants schemes, these investments will deliver meaningful, long-term outcomes that offer a genuine legacy of investment in the local area.

Anticipated timeline

The proposed Keri Keri Wind Farm is considered a State Significant Development under the Environmental Planning and Assessment Act 1979. ACCIONA Energía lodged Scoping Reports and received Secretary's Environmental Assessment Requirements (SEARs) from the NSW Government during 2022. The Environmental Impact Statement (EIS) was lodged in 2024, and the Response to Submissions in early 2026. The commencement of construction will depend on a number of factors and, at this stage, is yet to be determined.
