

HERRIES RANGE WIND FARM SOCIAL & ECONOMIC BENEFITS

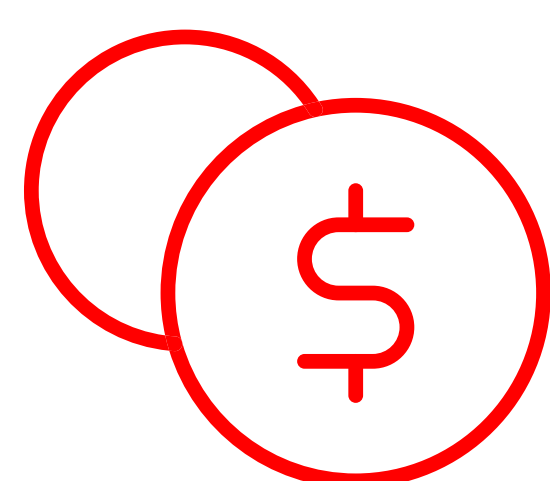

ACCIONA Energía is proud to be a part of the local Goondiwindi, Southern Downs and Toowoomba communities. We understand regional communities expect to experience the benefits of hosting renewable energy developments and Herries Range Wind Farm will create significant local jobs and training opportunities, deliver meaningful participation pathways for local businesses, and contribute a dedicated program of community benefits. We also partner with local governments and the community to deliver legacy projects that make a real difference to the region.

ACCIONA ENERGÍA'S TRACK RECORD

More than one third of all hours on the construction of MacIntyre Wind Farm were delivered by workers living within 125 km of the project.

More than \$115 million was procured from more than 80 businesses in and around the Darling Downs region for the construction of MacIntyre Wind Farm.

Over \$2.5 million in direct funding to local community benefit initiatives through the MacIntyre Wind Farm small grants program.

\$500,000 contribution for the installation of a new 4G Telstra tower to improve mobile connectivity, \$250,000 funding for the new gym facility in Inglewood, and firefighting support in February 2026 through provision of earthmoving equipment to the local Rural Fire Service.

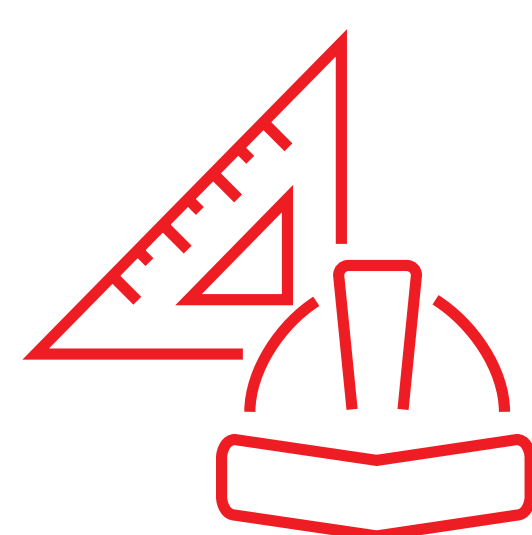

HERRIES RANGE WIND FARM BENEFITS

Jobs

Up to 650 direct jobs during construction and 50-60 ongoing full-time roles in the MacIntyre Wind Precinct, with an estimated 4-5x in indirect and induced jobs.

Skills legacy

Growing workforce capability by funding 250 white cards and 100 RII tickets, enhancing local business resilience by assisting to deliver apprenticeships and traineeships, and supporting career mentoring for high school students.

Supporting local procurement

Providing up-front support in navigating procurement and tendering processes, breaking down work packages for local businesses, and establishing clear targets for local content.

Housing contribution

Up-front contribution to support increasing local housing supply in consultation with local and regional stakeholders.

Community benefits

Direct payment to local councils of at least \$1,050/MW per year which equates to more than \$30 million over project lifetime for investment in community benefit initiatives.

Neighbour benefits

Direct payments to eligible neighbouring landholders, recognising the impacts of living near the project & ensuring economic benefits are shared with those closest to the project.

Environmental benefits

Over 50 million tonnes in CO₂ and more than 400 thousand tonnes of SO₂ and NO_x emissions avoided.
