

MACINTYRE WIND FARM

We're thrilled to bring you the latest progress update on the Macintyre Wind Farm construction. As we move closer to our goal of clean, sustainable energy generation, each milestone achieved is a testament to the dedication and hard work of everyone involved. We are on track to have the first 27 turbines operational and generating power in Q2 of 2024.

Project Update

HERE'S A SNAPSHOT OF WHERE WE STAND:

122
WIND
TURBINES
STANDING
TALL

We're delighted to announce that 107 wind turbines are now complete, ready to be commissioned and powering clean energy into the grid.

162
FOUNDATIONS
FIRMLY IN
PLACE

With 100% of the foundations poured, the structural backbone of the wind farm is solid, ensuring stability and longevity for years to come.

**HARD-
STANDS
READY
FOR TURBINE
ERECTION**

Every hardstand is now complete and primed for turbine erection, marking a significant step towards the operational phase of the project.

450
PEOPLE
ON SITE

Dedicated Workforce

With over 450 people onsite most days, the Macintyre Wind Farm is not an ordinary project; it's an achievement of huge proportion, realised through the hard work of many businesses.

3
MILLION
HOURS OF
SAFE WORK

Safety and Commitment

Safety remains our top priority, with over 3 million hours worked to date without compromise. Over 3,000 workers have been inducted, ensuring a culture of safety and accountability at every step.

OVER 173,050m OF MV CABLING

THE GROUNDWORK CONTINUES WITH OVER 173 KILOMETERS OF MEDIUM VOLTAGE (MV) CABLING EXPERTLY TRENCHED, PAVING THE WAY FOR EFFICIENT ENERGY TRANSMISSION.

INTERMEDIATE SWITCHING STATION OPERATIONAL

THE MACINTYRE INTERMEDIATE SWITCHING STATION IS COMPLETE AND ENERGISED, POISED AND READY TO FACILITATE THE SEAMLESS TRANSITION OF GENERATED POWER INTO THE GRID.

OVER 220 KILOMETRES OF ACCESS ROADS CONSTRUCTED

EXTENSIVE ACCESS ROADS HAVE BEEN CONSTRUCTED, SPANNING THE SAME DISTANCE AS FROM BRISBANE TO THE SITE ITSELF - FACILITATING SMOOTH LOGISTICS AND TRANSPORTATION.

FINAL COMPONENT DELIVERIES

THE FINAL SHIPMENT OF COMPONENTS HAS BEEN SUCCESSFULLY DELIVERED TO THE PORT OF BRISBANE, MARKING THE CULMINATION OF METICULOUS PLANNING AND EXECUTION.

Nominations now being sought for the MacIntyre Wind Farm Precinct Community Engagement Committee

The MacIntyre Wind Farm Precinct Community Engagement Committee (CEC) will represent the MacIntyre, Herries Range and Karara Energy Projects (the Project Precinct) during the construction and operations phases of these projects.

The CEC provides a forum for open discussion between ACCIONA Energía, the community and other stakeholders on issues directly relating to the wind farm's construction activities, operations, and community relations, and to keep the community informed on matters affecting them relating to the Project.

Nominations are open for appointment of community members to the MacIntyre Wind Farm Precinct CEC

We are looking for a mix of people who live locally, ie near Karara or within the Southern Downs, Goondiwindi or Toowoomba Regional Council areas; are considered a leader in the community or are a member of a stakeholder group (community, environment, Aboriginal, local council or industry) to join our new MacIntyre Wind Farm Precinct Community Engagement Committee.

The role of a committee member is voluntary.

You will be expected to contribute constructively to committee discussions, attend around four meetings a year across the region, and facilitate the flow of information about the MacIntyre Wind Farm Precinct between the committee and the broader community.

If you would like to apply, you will find further information and a copy of the Nomination Form at <https://community.acciona.com.au/macintyre/macintyre-precinct-cec>

Closing date for applications: Sunday, 30 June 2024.

For further information: Katie Unipan, 0408 446 525 or katie.unipan@acciona.com

EDUCATIONAL PRESENTATIONS AT LOCAL SCHOOLS

Empowering Young Minds at the School of Total Education

Hoping to inspire young people to explore a career in the renewable energy industry, our team recently visited the School of Total Education in Warwick.

Our presentation focused on introducing ACCIONA Energía's MacIntyre Wind Farm and discussing the renewable energy industry's pivotal role in climate change mitigation. The event included a knowledge-testing quiz and practical wind turbine model building, igniting students' curiosity and deepening their understanding of renewable energy production at our local wind farm, just 50kms outside of Warwick.

Engaging discussions about future careers in renewable energy highlighted diverse opportunities, ranging from entry level engineering positions to machine operator roles, currently in high demand across the sector. The event aimed not only to educate but also to inspire students to envision their contributions to a sustainable future. Thank you to the school staff for their invitation and warm welcome!

ACCIONA Energía joined Construction Skills Queensland for Construction Chat at Warwick State High School

Warwick State High School recently welcomed representatives from ACCIONA Energía's MacIntyre Wind Farm team, Benjamin Philipp and Anna-Selina Young, along with Daniel Stevens from BMS Heavy Cranes, for an engaging Construction Chat. Hosted by Construction Skills Queensland (CSQ), this event provided students with valuable insights into the construction industry and career pathways.

During the Construction Chat, students had the opportunity to learn from experienced professionals about their career journeys and industry experiences. The event was made possible by CSQ's Jason Wright, showcasing a commitment to empowering education and fostering industry connections.

A special thank you to Jason Wright (Industry Engagement Manager – CSQ), Will Curthoys (Principal – Warwick State High School), Ana Naoom (Industry Liaison Officer – Warwick State High School), and Tanya Wright (Head of Teaching and Learning, and Physical Education – Warwick State High School) for organising this enriching experience.

Engaging with Community Advisory Networks

ACCIONA Energía has recently joined two important community networks: the Warwick Community Advisory Network Group and the Inglewood Advisory Network. These platforms serve as invaluable platforms for connecting with a diverse range of community organisations, fostering collaboration, and staying informed about community needs and initiatives.

By actively engaging with these advisory networks, our team gains access to in-depth updates on local needs, ongoing initiatives, and opportunities for meaningful collaboration. This direct connection with the community enables us to align our efforts effectively and contribute meaningfully to initiatives that enhance the wellbeing of residents in Warwick and Inglewood.

We are grateful for the chance to be part of these networks and look forward to building strong partnerships to positively impact the communities in which we operate.

Visits to the MacIntyre Wind Farm

Last Easter, family members of the MacIntyre Wind Farm workforce had the opportunity to tour our facilities and project site. The tour included visits to the onsite workers' camp, canteen, recreational areas, and a walkthrough of our office spaces.

During the tour, our workers' youngest family members built miniature wind turbine models and participated in our MacIntyre Wind Farm scavenger hunt, adding interactive and educational activities to their visit. Meanwhile, other guests gained a deeper understanding of their family members' work on the largest wind farm south of the equator. The event was a wonderful opportunity for families to connect on site, take photographs together and learn more about renewable energy.

Please note, our monthly MacIntyre Wind Farm Community Project Site Tour schedule has now been extended and further dates are available for bookings via our [Eventbrite portal](https://www.eventbrite.com.au/e/778029977607).

Providing in-kind support to Local Community Organisations

As a gesture of community support, our MacIntyre Wind Farm team recently donated two laptops to the Inglewood Lions Club and Protea Place Inc. in Warwick. These contributions are aimed at assisting these vital local organisations in their day-to-day operations.

The laptop donated to the Inglewood Lions Club will be a valuable tool for their club and office operations, enhancing their ability to organise events, manage administrative tasks, and stay connected with members.

At Protea Place Inc., a local women's support centre, the donated laptop will directly benefit their clients by enabling them to complete essential tasks such as job applications, property searches, and other online activities.

Our team also extended a helping hand to Warwick's vibrant community by donating two Warwick Show Day Family Passes. These passes, a gift to local health organisations headspace Warwick and Goolburri Aboriginal Health Advancement, were aimed at providing families with a memorable experience while supporting the local economy and tourism sector.

We are excited about the positive impact these in-kind donations have on our local communities and remain dedicated to supporting diverse sectors across the Southern Downs and Goondiwindi regions.

COMMUNITY DONATIONS

3,500
TREES

Inaugural Tree Donations Initiative in Queensland

We are proud to announce the successful completion of our inaugural tree donations initiative in Queensland. Through this initiative, ACCIONA Energía distributed nearly 3,500 trees to local community groups and individuals across the Southern Downs, Goondiwindi, and Toowoomba regions. By supporting reforestation efforts and creating additional wildlife habitat and biodiversity, we aim to contribute positively to the local ecosystem.

Numerous organisations and groups benefitted from this initiative, including the Toowoomba Wilderness Society, Darling Downs Moreton Rabbit Board, Killarney Bushcare, the

Anglican Parish of Warwick, Back Plains State School, and St Joseph's School in Millmerran. Their involvement and dedication to environmental conservation are instrumental in ensuring the success of such initiatives.

As we eagerly anticipate the growth and development of these trees, we also look forward to maintaining close connections with our donation recipients.
